

**Project Title:** “FlixRecos”

Team Members:

**Project Manager:** Mamaril, Ralph Luis D

**Lead Developer:** Mamaril, Ralph Luis D. and Lozano, Melchizedek Joshua S

**Assistant Developer:** Cutchado, Jeffrey S.

**UI Designers:** Mamaril, Ralph Luis D. and Lozano, Melchizedek Joshua S

**Project Overview:**

"FlixRecos" is a system that aims to recommend movies depending on the user's preferred genre. The system will feature an easy-to-use interface and up-to-date movie lists. FlixRecos seeks to provide users with a better experience when choosing a movie.

**Objectives:**

**User Interface Enhancement:** Create an intuitive and responsive user interface to ensure easy navigation.

Implement a simple drop-down function to choose genres the user likes to find movies quickly.

**Movie Database Integration:** Integrate a movie database for updated movie listing.

**System Optimization:** Optimize FlixRecos for it to perform efficiently and effectively within our users standards.

Debug the system as much as possible with our current abilities.

**Features:**

**Movie Display:** Display a comprehensive catalog of movies with detailed descriptions and images.

**Genre Selection:** Enable users to choose the genre they want.

**Bookmarking System:** Enable users to Bookmark movies they have watched and would like to watch.

**Tools:**

**Programming Language:** Java

**Development Environment:** IntelliJ, NetBeans IDEA

**Project Scope:**

FlixRecos will only provide functions like movie suggestions and a bookmarking system. It will not include a movie rating system

**Timeline:**

Start Date: March 08, 2024

End Date: April 27, 2024

**Milestones:**

Milestone 1: UI Development

Develop the user interface for movie browsing.

Due Date: March 23, 2024

Milestone 2: Movie Database

Integrate a Movie Database.

Due Date: April 6, 2024

Milestone 3: Bookmarking System

Develop a system to allow the users to Bookmark Movies.

Due Date: April 20, 2024
